

Items NOT to have in your house if you own Birds!

Teflon (it causes a birds lungs to collapse)

Candles of any kind for that matter.

It is the essential oils in them that are deadly.

Incense (All)

I have found a nice way to scent the house, especially during the holidays and is safe for your bird buddies, is to put a whole apple, a stick of cinnamon, a half T-spoon of vanilla extract or vanilla bean is better, combined with water into a crockpot. after awhile it smells kind of light dutch apple pie.

enjoy

warmly,

Michael Cox
